

# Asset Management 360

*Connect to the Real Asset World*

SMART | AM360

Asset Management (AM) 360 is a totally integrated commercial off the shelf (COTS) asset management solution that delivers end-to-end asset coverage across planning, acquisition, tracking, management, redeployment, utilization and disposal functions, ultimately optimizing equipment investment for Corporate Clients, Federal Agencies, and Government Contractors.

**AM 360**, a true enterprise asset management system, directly connects all your physical operations - engineering, R&D, manufacturing, office and field - with your ERP/Financial Systems.

- ▶ Provides better accountability at lower cost by tapping into daily asset transactions such as calibration, maintenance, and moves to keep your financial records absolutely current
- ▶ Reduces capital replacement expenditures through more effective acquisition screening which makes better use of the assets you already own
- ▶ Enables rapid response redeployment of assets as products and missions change, vastly improving utilization and product support
- ▶ Eliminates the waste in maintaining hidden information silos, non-compliant spreadsheets, and desktop tracking systems
- ▶ Connects all your key users worldwide through the latest web technology, security, and Cloud Computing

# Asset Management 360

## The Results

Asset Management 360 is a unique global asset management solution that provides total visibility across the enterprise resulting in increased return on assets and reduced capital expenditures.

- ▶ Enterprise asset visibility results in capital appropriation reductions of up to 20% per year
- ▶ Improves return on assets, asset utilization, ROI and accelerates cash flow through true asset lifecycle management and operational efficiencies
- ▶ Compliance with corporate/government standards and simplified agency reporting avoids negative audit consequences
- ▶ COTS software allows for rapid deployment and does not require costly customization

## Product Capabilities

AM 360 is fully modularized to provide an optimum solution for each client's unique requirements and includes the following major modules:

- ▶ Property and Equipment Management  
**SMART | PEMS**
- ▶ Mobile Asset Tracking  
**SMART | AMIIX**
- ▶ Enterprise Cataloging System  
**SMART | ENCATS**
- ▶ Calibration/Maintenance System  
**SMART | CMS**

AssetSmart offers additional modules addressing the needs of planning, budgeting and ordering, tools, materials and spares management, billing, UID, allowing companies to cost-effectively select the modules that meet their business needs.

## Property and Equipment Management System SMART | PEMS

- ▶ Proven asset tracking and reporting system used by 4 of the top 6 defense contractors
- ▶ Supports company, government, customer leased, special tooling, IT, laboratory, office, test and manufacturing equipment
- ▶ Meets FAR contract property reporting requirements —DoD UID, compliance automated SF1428, DD1149, and NASA 1018 reporting; and PCARSS file generation.

## Mobile Asset Tracking SMART | AMIIX

- ▶ A fully integrated mobile computer barcode solution that enables the automated collection of inventory and utilization data, and performs field transactions such as asset receipts, shipments, moves, warehouse checkouts and returns
- ▶ Supports pre-loaded, blind scans, inventory by exception as well as the option to preview and approve results during the upload process
- ▶ Compatible with both Oracle and SQL Server and runs on 100% Microsoft Technology

## Enterprise Cataloging System SMART | ENCATS

- ▶ Uniformly standardizes equipment descriptions to provide a common asset tracking language across all users, including the ERP accounting system, to better cross-utilize technology and manufacturing assets
- ▶ Uncovers 20% or more of ones asset records that are hidden from view due to incorrect, incomplete or missing descriptive attributes
- ▶ Search capability for equipment by performance specifications, a vital tool in daily redeployment and acquisition screening

## Calibration/Maintenance System SMART | CMS

- ▶ A powerful calibration maintenance, repair, PM and work scheduling system that provides real-time visibility for metrology departments and end users
- ▶ Online reverse traceability search, failure analysis, multi-parameter backlog query, electronic procedures, and measurement readings capture with automatic flagging of out-of-tolerance data
- ▶ Meets or exceeds compliance with ANSI/ NCSL Z540, ISO 9000 and 17025, and FDA 21 CFR Part 11

## The Company

AssetSmart is comprised of expert Asset Management Professionals that have been delivering corporate asset and government property management solutions for over 35 years. Founded in 1971, AssetSmart by PMSC continues to provide industry leading asset management solutions for the Global 2000, space, defense, communications, electronics and manufacturing companies as well as major government facilities. We pride ourselves on being customer centric, by including offerings such as Help Desk, implementation assistance, data cleanup, customization, and training services.
