Automated Unique Identification

SMART | AUID®

AM360 provides contractors with 360 degrees of property visibility and life-cycle automation, anywhere in the world, through an integrated open-architecture web and mobile platform easily connected to ERP and other systems.

The **SMART | AUID** interface connects asset systems to the Department of Defense Item Unique Registry. This automated COTS software solution generates, validates, and uploads item and event data to the IUID Registry saving time and money while ensuring DFARS 252.211-7007 compliance.
