

# Planning and Request

SMART | RTX™

AM360 provides test equipment managers, laboratory personnel, metrology professionals, and customers with 360 degrees of equipment and work visibility anywhere in the world, through an integrated open-architecture platform. It has the ability to operate in stand alone mode and when a network connection is available the bi-directional record synch updates server and mobile databases.

The **SMART | RTX** Planning and Request software for test asset managers connects test asset acquisition processes including requesting, redeploying, searching by performance specification, planning, authorizing, ordering and receiving test equipment to the existing asset management suite.
